Kristek Precision.

An AS9100 approved, CNC machine shop.

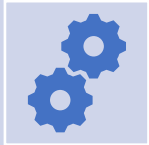

Company highlights

- Established since 1987 (38+ years of trading)
- Based in Melksham, Wiltshire
- Precision CNC machining with:
 - Lights-out production
 - 5-axis capabilities
 - Large machining capacity (Ø1.5 metre turning, and 2 metres long milling)
 - Manual grinding
- AS9100 accredited
- Environmentally conscious – reduce, reuse, recycle as much as possible
- Professional, friendly, open communication

There's precision; and there's Kristek Precision.

Why Customers Work With Us

A Dependable and Reliable Supplier.

With a focus on production, repeat parts, our systems are developed to produce repeatable consistent parts, every time, keeping your supply chains moving.

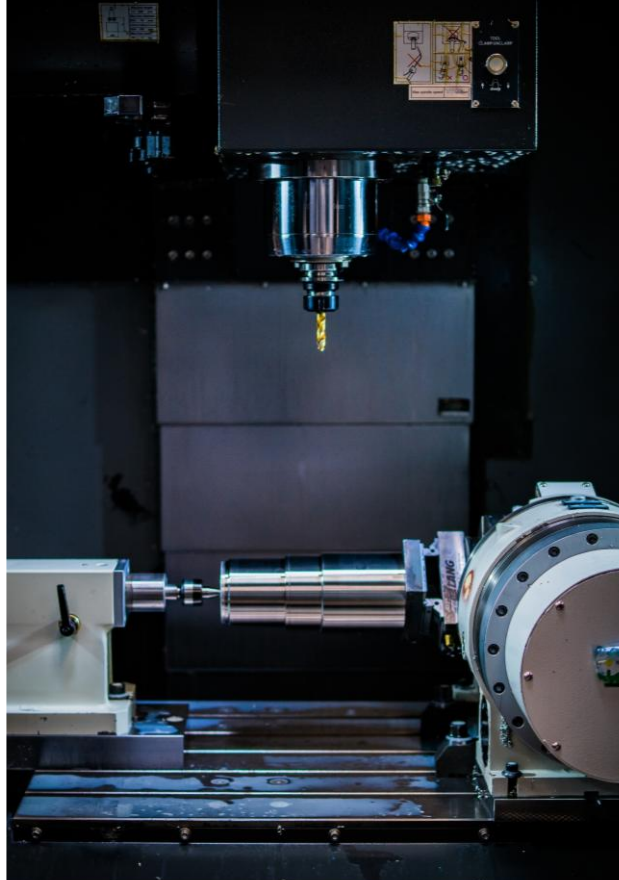

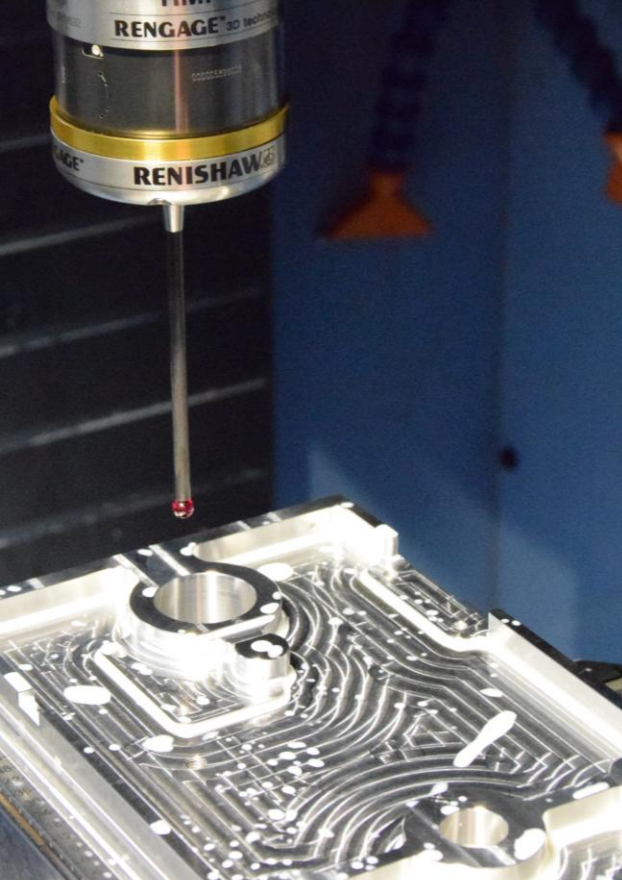

Open Communication and Flexibility.

We always keep our customers updated on any development or changes; like-wise if your requirements or your customer needs change, and new priorities arise, just let us know – we are here to support.

Continuous Improvement.

We welcome customer audits to improve our Quality Management System, this also gives you the confidence we are working to the high standards that the Aerospace industry demands and requires.

Some examples of our work and equipment

There's precision; and there's Kristek Precision.

Our clean, modern, and organised workshop

We have two Workshops, positioned next to each other with a walkway to join them

There's precision; and there's Kristek Precision.
